

# BUILD YOUR OWN AQUARIUM!

## You will need

- An empty cereal box
- Paper
- Scissors
- Glue
- String
- Blue and white poster paint
- Tape

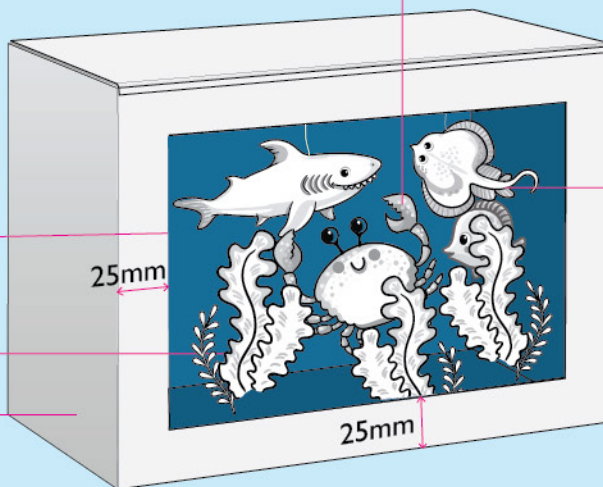

### STEP 1

Cut out a big hole on one side of the cereal box. This is your aquarium's window!

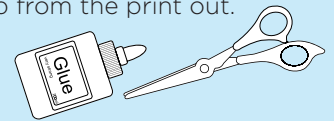

STEP 1

STEP 2

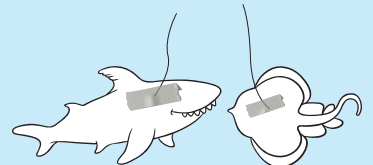

### STEP 3

Cut out all the marine animals and help from the print out.

### STEP 4

Use tape to stick a piece of string behind the fishes, and stick the other end of the string on the 'ceiling' of the aquarium to make them 'swim'! Use glue to stick the other fish to the inside of the box.

### STEP 2

Paint the outside of the box white, and the inside of the box blue.

## CONGRATULATIONS!

## YOU'RE NOW THE PROUD OWNER OF YOUR VERY OWN AQUARIUM!

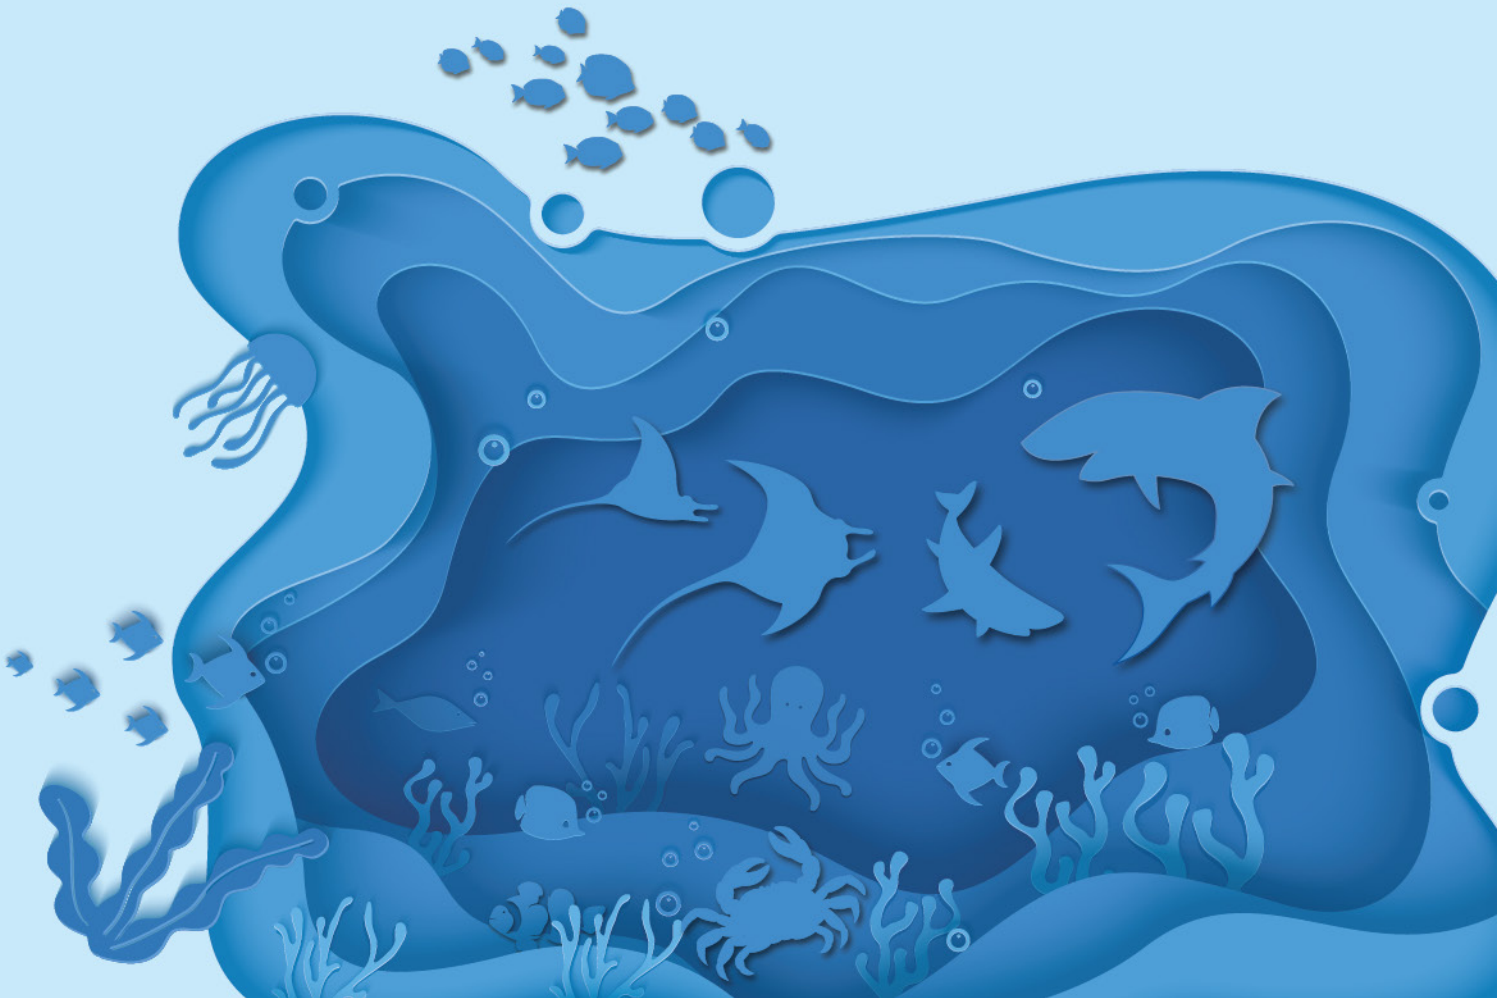

# WHERE IN THE OCEAN DO FISH LIVE?

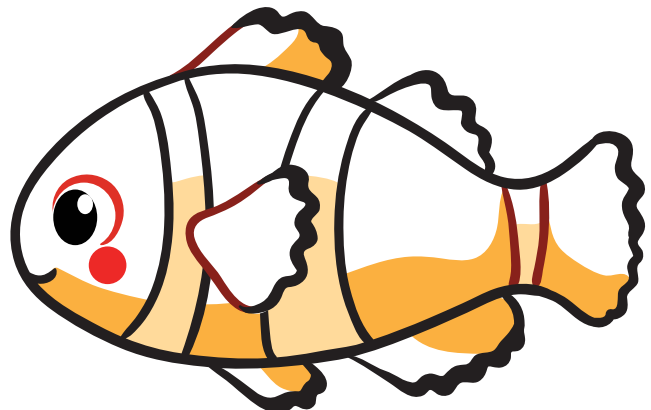

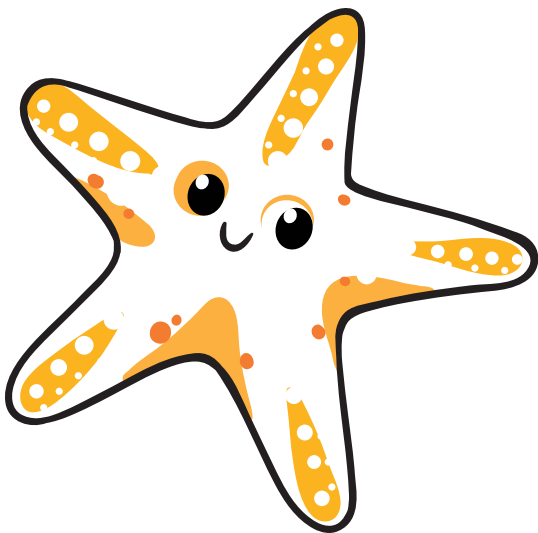

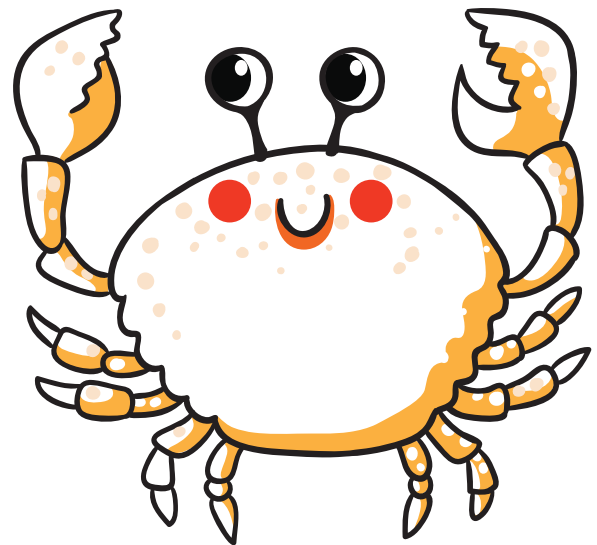

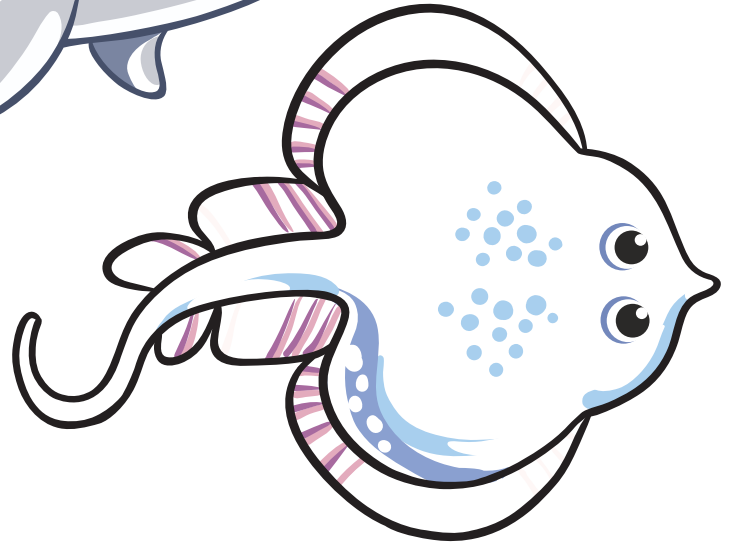

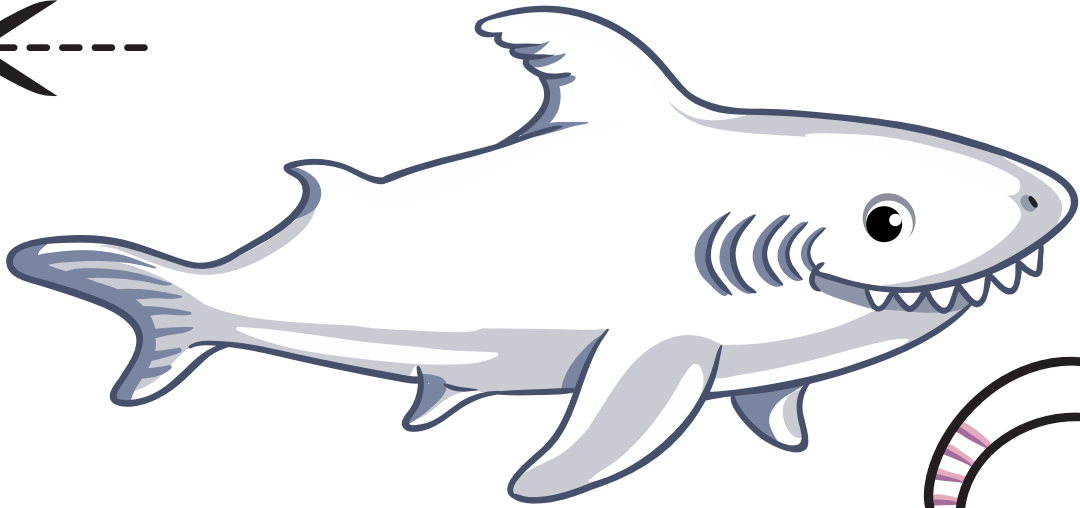

Different parts of the ocean have their unique characteristics.

On the seabed, you'll find animals that live on the sand. These include crabs, stingrays, guitarfish, octopuses and shellfish.

In the water column, you'll find animals that are constantly swimming around. These include sharks, groupers, trevallies and bannerfish.

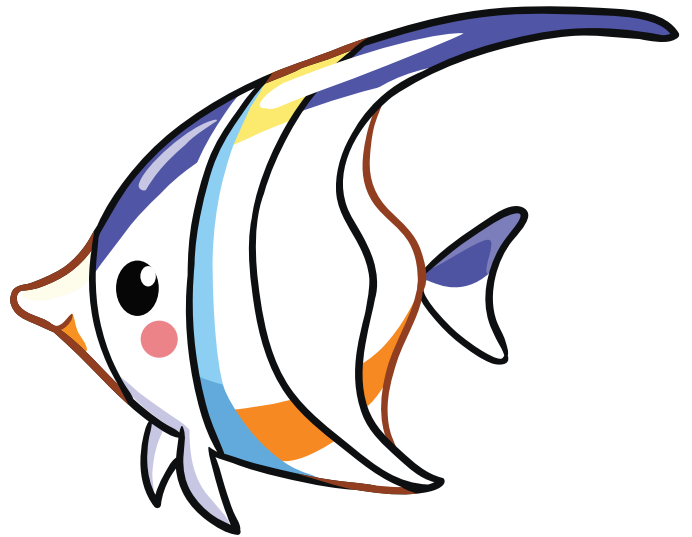

Closer to the surface, you'll find animals such as the beautiful manta rays feeding on the microscopic plankton that live here.
